

# FRACTIONAL AIRCRAFT OWNERSHIP THROUGH MyJET

---

If you've ever wondered just how it would feel to own your own aircraft, now's the time to stop wondering. Because with fractional ownership through MyJET, you can experience all the joy of owning your own plane, at a mere fraction of the cost.

---

## The Concept

The MyJET proposition is based on fractional ownership of the aircraft. There would be up to five owners per aircraft. Each would pay an entry figure for their equity in the aircraft, a monthly fee to cover crew, insurance and other fixed costs, and an hourly rate for its use.

Since MyJET is based on fractional ownership, the goal is to progressively build a fleet of aircraft. This ensures that the various owners will have access to an aircraft whenever they require it.

The initial MyJET aircraft, based on customer preference, will be a Learjet 60XR with

trans-Tasman capabilities and a Beechcraft Premier for domestic use. The plan is to have more than one of each aircraft, so owners will always have access when they need it.
